Protegé® 616 Digital Hybrid Key System

The Protegé® 616 system is designed to provide a very cost effective communication solution to the small office/home office market. It supports up to three central office lines and eight digital keyset ports with expandability to a total of six central office lines and sixteen digital keyset ports.

The following Protegé devices are supported on the 616 system: 17-button business set, 26-button business set with LCD, 31-button executive set with LCD, 31-button

executive data set with LCD, analog adapter, and voice mail. With these key components, migration to larger Protegé systems is made easier and more cost effective.

The Key Service Unit (KSU) also supports music on hold and external paging devices.

One Sprint. Many Solutions.™

Business Keyset

LCD Business Keyset

Executive Keyset

Business Keyset

This 17-button phone is perfect for small-to-medium size businesses. It provides 9 programmable keys that can be used for central office line appearances, feature keys, or as speed dial keys.

LCD Business Keyset

This 26-button keyset combines all the features of the Business Keyset with a 16-character, 2-line display and 3 interactive function keys to maximize productivity. This keyset also provides 15 programmable feature keys that can be used for central office line appearances, feature keys, or as speed dial keys.

Executive Keyset

This 31-button Executive Keyset comes with all the features of the Business Keyset with Display, plus even more time- and money-saving features. An Executive Data Keyset is also available with all the features of the Executive Keyset plus a Data Port that provides a bi-directional serial communication link to your personal computer.
